NSDI ’16: 13th USENIX Symposium on Networked Systems Design and Implementation

March 16–18 • Santa Clara, CA

Sponsored by USENIX, the Advanced Computing Systems Association, in cooperation with ACM SIGOPS

Important Dates

• Paper titles and abstracts due: September 17, 2015
• Complete paper submissions due: September 24, 2015, 4:59:59 p.m. PDT
• Notification to authors: December 7, 2015
• Final papers due: February 18, 2016, 4:59:59 p.m. PST

Symposium Organizers

Program Co-Chairs
Katerina Argyraki, EPFL
Rebecca Isaacs, Google

Program Committee
Aditya Akella, University of Wisconsin—Madison
Mohammad Alizadeh, Massachusetts Institute of Technology
Mona Attariyan, Google
Mahesh Balakrishnan, Yale University
Hari Balakrishnan, Massachusetts Institute of Technology
Aruna Balasubramanian, Stony Brook University
Sujata Banerjee, HP Labs
Paul Barford, University of Wisconsin—Madison and comScore
Ranjita Bhagwan, Microsoft Research India
Nathan Bronson, Facebook
Paolo Costa, Microsoft Research
Paul Francis, Max Planck Institute for Software Systems (MPI-SWS)
Monia (Manya) Ghobadi, Microsoft Research
Shyam Gollakota, University of Washington
Jon Howell, Google
Kyle Jamieson, Princeton University
Srikanth Kandula, Microsoft
Brad Karp, University College London
S. Keshav, University of Waterloo
Changhoon Kim, Barefoot Networks
Ramakrishna Kotla, Amazon
Jinyang Li, New York University
David Lie, University of Toronto
Kate C.J. Lin, Academia Sinica, Taiwan
Wyatt Lloyd, University of Southern California
Jay Lorch, Microsoft Research
Ratul Mahajan, Microsoft Research
Prateek Mittal, Princeton University
Thomas Moscibroda, Microsoft Research
David Oran, Cisco Systems
Oriana Riva, Microsoft Research
Vyas Sekar, Carnegie Mellon University
Siddhartha Sen, Microsoft Research
Srinivasan Seshan, Carnegie Mellon University
Ankit Singla, University of Illinois at Urbana–Champaign
Jonathan Smith, University of Pennsylvania
Alex Snoeren, University of California, San Diego
Kobus Van der Merwe, University of Utah
Laurent Vanbever, ETH Zürich
Matt Welsh, Google

Overview

NSDI focuses on the design principles, implementation, and practical evaluation of networked and distributed systems. Our goal is to bring together researchers from across the networking and systems community to foster a broad approach to addressing overlapping research challenges.

NSDI provides a high-quality, single-track forum for presenting results and discussing ideas that further the knowledge and understanding of the networked systems community as a whole, continue a significant research dialog, or push the architectural boundaries of network services.

Topics

We solicit papers describing original and previously unpublished research. Specific topics of interest include but are not limited to:

• Highly available and reliable networked systems
• Security and privacy of networked systems
• Distributed storage, caching, and query processing
• Energy-efficient computing in networked processing
• Cloud/multi-tenant systems
• Mobile and embedded/sensor applications and systems
• Wireless networked systems
• Network measurements, workload, and topology characterization systems
• Self-organizing, autonomous, and federated networked systems
• Managing, debugging, and diagnosing problems in networked/distributed systems
• Virtualization and resource management for networked systems and clusters
• Systems aspects of networking hardware
• Experience with deployed/operational networked systems
• Communication and computing over big data on a networked system
• Practical aspects of network economics
• An innovative solution for a significant problem involving networked systems

Operational Systems Track
In addition to papers that describe original research, NSDI ’16 also solicits papers that describe the design, implementation, analysis, and experience with large-scale, operational systems and networks. We encourage submission of papers that disprove or strengthen existing assumptions, deepen the understanding of existing problems, and validate known techniques at scales or environments in which they were never used or tested before. Such operational papers need not present new ideas or results to be accepted.

Authors should indicate on the title page of the paper and in the submission form that they are submitting to this track.

What to Submit
Submissions must be no longer than 12 pages, including footnotes, figures, and tables. Submissions may include as many additional pages as needed for references and for supplementary material in appendices. The paper should stand alone without the supplementary material, but authors may use this space for content that may be of interest to some readers but is peripheral to the main technical contributions of the paper. Note that members of the program committee are free to not read this material when reviewing the paper.

Submissions must be in two-column format, using 10-point type on 12-point (single-spaced) leading, with a maximum text block of 6.5” wide x 9” deep, with .25” inter-column space, formatted for 8.5” x 11” paper. Papers not meeting these criteria will be rejected without review, and no deadline extensions will be granted for reformatting. Pages should be numbered, and figures and tables should be legible when printed without requiring magnification. Authors may use color in their figures, but the figures should be readable when printed in black and white.

NSDI is single-blind, meaning that authors should include their names on their paper submissions and do not need to obscure references to their existing work. Authors must submit their paper’s title and abstract by September 17, 2015, and the corresponding full paper is due by September 24, 2015 (hard deadlines). All papers must be submitted via the Web submission form linked from the Call for Papers Web site, www.usenix.org/nsdi16/cfp. Do not email submissions.

Submissions will be judged on originality, significance, interest, clarity, relevance, and correctness. Papers so short as to be considered “extended abstracts” will not receive full consideration.

NSDI ’16 Policies
Simultaneous submission of the same work to multiple venues, submission of previously published work, or plagiarism constitutes dishonesty or fraud. USENIX, like other scientific and technical conferences and journals, prohibits these practices and may take action against authors who have committed them. See the USENIX Conference Submissions Policy at www.usenix.org/conferences/submissions-policy for details.

Previous publication at a workshop is acceptable as long as the NSDI submission includes substantial new material. For example, submitting a paper that provides a full evaluation of an idea that was previously sketched in a fivepage position paper is acceptable. Authors of such papers should cite the prior workshop paper and clearly state the submission’s contribution relative to the prior workshop publication.

Authors uncertain whether their submission meets USENIX’s guidelines should contact the Program Co-Chairs, nsdi16chairs@usenix.org.

Papers accompanied by nondisclosure agreement forms will not be considered. All submissions will be treated as confidential prior to publication on the USENIX NSDI ’16 web site; rejected submissions will be permanently treated as confidential.

Ethical Considerations
Authors must honor the ACM code of ethics. For details, see www.acm.org/about/code-of-ethics. In particular, they must not endanger or mislead the users participating in their studies or experiments, nor reveal any personal information of these users without their explicit consent. The Program Committee reserves the right to reject a paper on the grounds that it does not meet these requirements.

Processes for Accepted Papers
Authors will be notified of paper acceptance or rejection by December 7, 2015. If your paper is accepted and you need an invitation letter to apply for a visa to attend the conference, please contact conference@usenix.org as soon as possible. (Visa applications can take at least 30 working days to process.) Please identify yourself as a presenter and include your mailing address in your email.

Accepted papers may be shepherded through an editorial review process by a member of the Program Committee. Based on initial feedback from the Program Committee, authors of shepherded papers will submit an editorial revision of their paper to their Program Committee shepherd. The shepherd will review the paper and give the author additional comments. All authors, shepherd or not, will upload their final file to the submissions system by February 18, 2016, for the conference Proceedings.

All papers will be available online to registered attendees before the conference. If your accepted paper should not be published prior to the event, please notify production@usenix.org. The papers will be available online to everyone beginning on the first day of the conference, March 16, 2016.

Best Paper Awards
Awards will be given for the best paper(s) at the conference.
