Program

Understanding Malware’s Network Behaviors using Fantasm	1
<i>Xiyue Deng, Hao Shi, and Jelena Mirkovic, USC/Information Sciences Institute</i>	
Open-source Measurement of Fast-flux Networks While Considering Domain-name Parking	13
<i>Leigh B. Metcalf, Dan Ruef, and Jonathan M. Spring, Carnegie Mellon University</i>	
Lessons Learned from Evaluating Eight Password Nudges in the Wild	25
<i>Karen Renaud and Joseph Maguire, University of Glasgow; Verena Zimmerman, TU Darmstadt; Steve Draper, University of Glasgow</i>	
An Empirical Investigation of Security Fatigue: The Case of Password Choice after Solving a CAPTCHA . . .	39
<i>Kovila P.L. Coopamootoo and Thomas Gross, Newcastle University; Muhammad F. R. Pratama</i>	
Dead on Arrival: Recovering from Fatal Flaws in Email Encryption Tools	49
<i>Juan Ramón Ponce Mauriés, University College London; Kat Krol, University of Cambridge; Simon Parkin, Ruba Abu-Salma, and M. Angela Sasse, University College London</i>	
The Impacts of Representational Fluency on Cognitive Processing of Cryptography Concepts	59
<i>Sumra Bari, Joseph Beckman, Victor Chen, Melissa Dark, and Baijian Yang, Purdue University</i>	
Self-Protective Behaviors Over Public WiFi Networks	69
<i>David Maimon, Michael Becker, Sushant Patil, and Jonathan Katz, University of Maryland</i>	
Measuring the Success of Context-Aware Security Behaviour Surveys	77
<i>Ingolf Becker, Simon Parkin, and Angela Sasse, University College London</i>
