FOUR DAYS TO GO

Con Char

2023-06-01	6.2.7.4.2	equal to the time encoded in the revocationDate field of the CRL entry. Effective June 1, 2023, for Code Signing Certificates, CAs SHALL ensure that the Subscriber's Private Key is generated, stored, and used in a suitable Hardware Crypto Module that meets or exceeds the requirements specified in section 6.2.7.4.1 (7-9).
2023-06-01	6.2.7.4.2	Effective June 1, 2023, for Code Signing Certificates, CAs SHALL ensure that the Subscriber's Private Key is generated, stored, and used in a suitable Hardware Crypto Module that meets or exceeds the requirements specified in section 6.2.7.4.1 using one of the methods in 6.2.7.4.2.
2023-06-01	6.2.7.4.2	Any other method the CA uses to satisfy the Subscriber's compliance with the private key protection requirements. The CA SHALL specify and describe in detail those other methods to the Certificate Policy or Certification Practice Statement, and SHALL propose those methods to the CA/Browser Forum Code Signing Working Group for inclusion into these requirements until June 1, 2023, using the questions@cabforum.org mailing list. After that date, the Code Signing Working Group will discuss the removal of this "any other method" and allow only CA/Browser Forum approved methods.
2024-04-15	4.9.1	This ballot updates the "Circumstances for revocation" in order to align it with the TLS and S/MIME

Two streams

We fix all the things!

- Fraud flag on org validation
- Alternate vault technology *will* comply
- Compliance OKs the crypto
- SecOps tries another CA
- Fraud flag *again*

Capacity across distances

- Engaging the Builds Team early
- Compliance bringing their A game
- Buying a *printer*, of all things

Prevention?

SLI: Service Level For Invoicing?

Near Miss?

Incident?

Surprise?

The Learnings™

- People learn different things from incidents.
- They learn in different ways, at different times, asynchronously.
- They will often learn things completely unrelated to the incident (or what others learn).
- ***We cannot control what is learned.***

Two Problems, Both Alike In Dignity

This will happen again.

We should share stories of failure.

We should share stories of near-failure.

“Theory of Graceful Extensibility”

David Woods

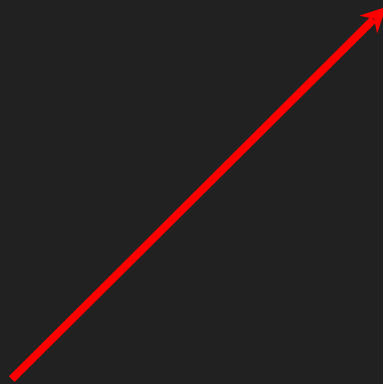

Woods, D.D. The theory of graceful extensibility: basic rules that govern adaptive systems.
Environ Syst Decis 38, 433–457 (2018). <https://doi.org/10.1007/s10669-018-9708-3>

Two Problems, Both Alike In Dignity

This will happen again.

We should share stories of failure.

We should share stories of near-failure.

But where do I go to tell stories?

- Talk inside your organisation
- Find a local meetup
- Contribute to The VOID - <https://www.thevoid.community/>
- APAC - I need help!

Let's trade!

*I used to be on Twitter, but then they changed what Twitter was,
now it's not Twitter and it seems weird and scary to me.*

IT'LL HAPPEN TO YOU
